

Demo or Trial Version
Posted by SJMarty - 2013/08/18 19:42

Before purchasing, I want to make sure the software works with my phone. I have a rooted LG Optimus L9 running v20F firmware. Is there a trial version available for download? Thanks.

I went ahead and purchased the full version from the Play store. So far, so good.

I do have a question...

Can any of the connections (HTML5, Java, or VNC Viewer) be encrypted? I do not see this as an option. I also searched the forum and didn't find any mention of encryption.

Encryption is not enabled yet.

VNC protocol does not specify any specific on how to encrypt, we will try to do something on this as we get more and more requests.

We are adding support to our app so it can send to chromecast, etc. for screen mirroring.
