

Galaxy S4 Custom Unlock Icon boot screen

Posted by langthang - 2013/09/03 11:18

VMLite VNC server will cause the boot screen to show the custom unlock icon. Uninstall VMLite will get rid it. Does VMLite comes with busybox? How do I fix this problem?

Thanks.

no, we don't include busybox, but if your device is rooted, and configure our vnc server to auto start on boot, it will prompt you for granting root permission.

this is what I meant

<http://img18.imageshack.us/img18/8910/20120813002112.jpg>

similar to <http://forum.xda-developers.com/showthread.php?t=2252730>

I have to uninstall VMLite VNC Server to get rid of the unlock padlock screen during boot
