

offline install / licence

Posted by z0idb3rg - 2013/12/10 21:11

I would like to install on a (development) device that will never have access to the internet (lives on an isolated network) - is that possible? Licence activation would appear to be the main issue.

Works great on my play store connected phone.

yes, we support that. but need to get the device's IMEI number or MAC address, then we provide an APK to you. You can purchase the app directly from us.

We usually don't handle single license purchase.
