

apk for Google glass
Posted by dq11 - 2014/02/06 23:36

Hello,
I just now purchased this app on the play store on my rooted galaxy nexus but my primary device that I want to use this vnc server app is actually the google glass and later a Samsung gear. Since Google glass does not have a play store, what are my options to get a license key for this apk since I purchased on play store and not from your website? Does this mean I have to purchase again from website? Gear does have access to play store but not google glass. Please advise how I can get a single license key to run on my Google glass which was my primary purpose for buying the app

Thanks

=====

We have tested and our vnc server works fine with Google Glass.

You are supposed to purchase another license, but I will provide you a free license to you, please forward your Google purchase receipt to our email address, info AT our domain name.

As a return, I'd appreciate if you can rate our app in google play.

sent you a license key and download apk. If you have trouble installing it, let me know. You need to enter the license key.
