

failed to connect to server: test.vmlite.com:9080

Posted by thh2014 - 2014/12/10 11:53

Hi,
yesterday I've got the license-key for rplay - and it works fine!

Thanks!!

Today there is no Airplay Mirroring and I get the message:

```
failed to connect to server: test.vmlite.com:9080
raop connection destroy:conn=0x2fbbb88
airplay connection destroy(conn=0x2fa7ef0)
```

(the license-key is in the rplay.conf)
Is the server down or how can I solve the problem?

Thanks!

The ping doesn't work!

```
ping test.vmlite.com
PING test.vmlite.com (76.247.191.59) 56(84) bytes of data.
^C
--- test.vmlite.com ping statistics ---
26 packets transmitted, 0 received, 100% packet loss, time 25170ms
```

```
other pings work, for example:
ping www.google.de
PING www.google.de (173.194.112.175) 56(84) bytes of data.
64 bytes from fra07s32-in-f15.1e100.net (173.194.112.175): icmp_req=1 ttl=56 time=35.9 ms
```

Hello,

I am experiencing the same issues. Airplay doesnt work, and I cannot ping test.vmlite.com, yet I have an active internet connection over ethernet. It was working last time I tried (a few days ago), and all of a sudden, nothing will get it to work.

```
airplay connection destroy (conn=0x25608d8)
raop connection init(conn=0x2bc4f60)
failed to connect to server: test.vmlite.com:9080
```

MG: Error 404: Not Found.

This happened when streaming audio/video as well....

Really hope this can be back online! :/

Does it work now? Our server has been up and running all the time.

Something wrong with USA network over last few days.

Hallo,

it works again! Thank You!

The program does its work as good as possible with the minimal recources of a raspberry pi. A banana pi will be the better one for daily work.

Bye Thomas

Hey Huisinro,

I believe the server is down again:

```
ping test.vmlite.com
PING test.vmlite.com (76.247.191.59): 56 data bytes
Request timeout for icmp_seq 0
Request timeout for icmp_seq 1
Request timeout for icmp_seq 2
Request timeout for icmp_seq 3
^C
--- test.vmlite.com ping statistics ---
5 packets transmitted, 0 packets received, 100.0% packet loss
```

Please advise, thanks!

Hey Huisinro looks like server is down again:

```
ping test.vmlite.com
PING test.vmlite.com (76.247.191.59): 56 data bytes
Request timeout for icmp_seq 0
Request timeout for icmp_seq 1
Request timeout for icmp_seq 2
Request timeout for icmp_seq 3
^C
--- test.vmlite.com ping statistics ---
5 packets transmitted, 0 packets received, 100.0% packet loss
```
