

## Vboot and MyOldPC tools

Posted by aussie\_bauer - 2011/12/01 14:39

---

Hi huisinro,

is there a new version of the above tools which I could have a look and do a bit of testing with.

Thanks. Dieter

vboot is quite update. Only one week ago, we released v2 beta, you can download and play. We will release another build next week.

MyOldPCs is quite old, need to sync it with vboot 2 and vmlite 4.2, will take a couple of months to get updated.

Is there a download link I can use.

Thanks.
