

running vboot images from Virtual PC (win7)

Posted by yherish - 2011/12/27 09:31

Hi,

How can I run a vboot created image vhd in window 7 virtual PC?

Is it possible? or should I only use it as native boot?

Thanks

yes, it's possible, you need to run a physical to virtual conversion.

If you use VMLite Workstation, you can start VMLite Wizard, and choose option (2) to convert.

Ok

When I finish How can re-convert or its not needed?

Thanks
